

TASK CARD 1: Hydraulics Introduction

Topic: Introduction to Hydraulics

Website URL: <http://www.nfpa.com/Training-Hydraulic/>

Activities to do at the Site:

1. Type in your TEACHER'S first and last name when asked (teacher should have an account)
2. Click "Submit" button
3. Select "Windows Media Player" radio button under "Player for video clips section"
4. Click "Start"
5. Watch and listen to the first introductory video
6. To advance to next slide, click on the arrow button found in the bottom right corner of video window
7. A table of contents for each lesson is found in the column on the right side
8. Work through each lesson and make sure you do them in the correct order

Follow-up Activity:

1. After school hours, take notice how hydraulics are used in society
2. Document all relevant (date, time, where, description of example, etc.) information on the times you witnessed hydraulics
3. Write a one page paper on what life would be like if all those examples you witnessed did NOT exist.
