## What is a Brain Wave? Worksheet

### Directions

Watch the YouTube video “What do different brain waves mean?” using the link [here](#). Then answer the following questions the best you can.

For questions 1 – 5, fill in the blanks below.

1. Neuroscientists call brain waves \_\_\_\_\_.
2. Frequency is measured in cycles, or the number of times the \_\_\_\_\_ are \_\_\_\_\_, per \_\_\_\_\_.
3. Generally, the \_\_\_\_\_ frequency the wave, the more \_\_\_\_\_ and \_\_\_\_\_ you are.
4. Different \_\_\_\_\_ of the brain are more commonly linked with certain waves.
5. People with Alzheimer’s don’t seem to use \_\_\_\_\_ waves as much as the average person.

For questions 6 – 10, circle **true** or **false**. If the answer is **false**, rewrite the statement so that it is true.

6. True/False: When you are in a deep sleep, your brain waves are **purely** delta waves.
7. True/False: Brain waves with slower frequencies tend to have **higher** amplitudes.
8. True/False: The types of brain waves that dominate your brain can depend on what you’re doing and how you’re feeling.
