## Wait Program! Worksheet

Answer the following questions related to program design:

1. Define the task you would like to perform:
2. Write a set of instructions in English for creating the program:
3. Brainstorm about possible programming solutions below and write the one below that your group thinks is a good one.
4. Did you have to “iterate” (make changes to the program, etc.) to make it work?  
How many iterations did you have to perform? Briefly explain each one.
