## RC Circuits Pre/Post-Quiz Answer Key

Match the term with its description. Some terms are used more than once.

1. Path of the electricity	<b>D</b>
2. Path electricity can completely flow around	<b>E</b>
3. Broken path that stops electricity from flowing	<b>I</b>
4. The force that pushes the electricity through the circuit	<b>M</b>
5. The flow of electricity	<b>F</b>
6. Devices that hinder the flow of electricity	<b>K</b>
7. Devices that store and discharge electrons	<b>C</b>
8. The units of resistance	<b>H</b>
9. The units of current	<b>B</b>
10. The units of voltage	<b>N</b>
11. Current that alternates its direction	<b>A</b>
12. The form of electricity from our wall sockets	<b>A</b>
13. Current that only flows in one direction	<b>G</b>
14. The form of electricity batteries pump out	<b>G</b>
15. A circuit containing resistors and capacitors	<b>J</b>
